

Weekly Progress Report			
Topic:	Chatbot – Final Project	Week No.	15
Course Code:	CSST101, CSST102	Term:	1st Semester
Course Title:	Advance Representation and Reasoning Basic Machine Learning	Academic Year:	2024-2025

### Main Tasks Assigned:

Implement error analysis on misclassified data points  
Adjust model and retrain to address identified issues  
Begin drafting the mid-term project report

### Work Completed:

We have chosen T5 as the model for the chatbot, because it seemed like a good fit for dynamic responses.

### Challenges Encountered:

We discovered that our dataset was not at all appropriate for the model because it required the dataset to be in question-answer format.

### Solutions Implemented:

We reworked our dataset (or datasets for that matter) to better fit the model. It was tough trying to condense thousands of lines worth of data, but we managed.

### Tasks for Next Week:

Try training with the new model.

### Instructor's Feedback:

Instructor's Signature: \_\_\_\_\_
